

Release name: KNOWAGE 7.4.13

From the previous version 7.4.10 the following issues are now solved:

- * Registry: System should highlight the modified rows to allow user understand the modified rows
- * Custom Chart: Chart is not resized correctly according to window size
- * Table widget: the order using a column of type timestamp is not working
- * Solr: error when total row is added to widget table
- * Solr filter query multivalue parameters errors
- * Single quote character inside document description issue
- * Elements overlapping scrollbar in cockpit
- * Reset button fails on filter panel if the driver is NUMERIC
