Release name: KNOWAGE 7.4.20

From the previous version 7.4.19 the following issues are now solved:

- When saving document metadata the saving function fails if a file has been uploaded
- CUSTOM CHART: in the preview section the checkbox to choose the dataset for doing the preview is not visible
- QBE, advanced viEw, the paginator data does not work
- QBE, join type is not correctly saved
- REGISTRY: it is not possible to export the registry in excel or csv
- Table Widget - export PDF: timestamp format is not correct
- Table widget XLSX export is cut off for large datasets in case some custom number precisions are defined
- When exporting table widget into XLSX, timestamps are exported as regular dates, without the time information
- Table widget displays integer values as float when using ORACLE numbers with 0 scale
- Table widget XLSX export displays integer values as float when using ORACLE numbers with 0 scale
- OLAP: an error occurs when user opens a private customized view that he previously saved
