

Release name: KNOWAGE 7.4

From the previous version 7.2 the following changes have been made:

GENERAL IMPROVEMENTS

- Creating a cockpit using SQL dataset on Google BigQuery tool is now possible.
- The possibility to create cockpit using a QBE data set with analytical driver adds more option to the self-service function.

NEW DOSSIER ENGINE

With this new tool it is possible to create dossier in Word or PPT format, the final result is an automatically produced document, enriched with the result of Birt and / or Cockpit reports. The editor can change manually both the Word template and the final result. The goal is to create a semi-automatic report ready for publication.

NEW OPTIONS ON COCKPIT

TABLE WIDGET:

- The table widget shows a new index column with the row numbers:
